**Experience**

**The Swedish Club • Front-end developer**

May 2022 - Present

Since May 2022, I've served as a Front-end Developer at The Swedish Club, a global insurance firm in the shipping sector. Specializing in React, Git, Jira, Mantine, Ag-Grid, and Tailwind, I've played a pivotal role in an agile team developing a platform to manage intricate insurance structures. My responsibilities included API utilization for data acquisition, designing complex state structures for effective user interaction, and rigorous data validation. I've gone the extra mile by effectively using React's useContext and reducers to optimize state handling. My substantial contributions have led to successful product launches and punctual project completions, significantly enhancing user experience and productivity.

**Devies • Internship**

January 2022 - May 2022

In a 16-week internship at Devies, my teammate and I developed an onboarding platform for new hires. This platform handles critical data, orders work gear, and facilitates registration processes. Our tech stack involved Typescript, React, C#, .NET, MongoDB, Azure, and Cypress. This project honed my skills in backend development, testing, and team collaboration.

**Education**

**IT-Högskolan • Javascript-developer**

August 2020 - June 2022

**Skills**

**Front-end development, UI/UX Design, Version Control, Agile Methodologies, Teamwork, Back-end Development, Cloud Services, Testing, Pipeline Management**

**Tools**

**Front-End Development • React, Vue, Typescript, Mantine, Ag-Grid, Tailwind**

**Structure • Git, JIRA, Azure, Cypress, Agile Methodologies**

**Design • Figma**

**Goals**

**Becoming team lead in Front-end development**
